

SCIENCE · GRADE 1

Animal Habitats

Where on Earth do animals live?

Five habitats

Habitat	What it's like	Two animals that live here
Desert	Hot, dry, sandy	Camel, scorpion
Ocean	Salty, deep water	Dolphin, octopus
Rainforest	Warm, wet, dense	Toucan, sloth
Polar	Frozen, cold	Polar bear, penguin
Grassland	Open, dry, grassy	Lion, zebra

Think about it

1. Why do you think a polar bear has thick white fur?
2. Why do camels store fat in their humps?
3. Could a fish live in the desert? Why not?
4. Match each animal to its habitat: penguin, parrot, lion, fish, snake.
