

# Canada's National Parks — Knowledge Organiser

Free from LessonKind · lessonkind.com · Qualified primary teacher

## Key facts

- National parks protect special natural places.
- Banff, in the Rocky Mountains, was Canada's first national park.
- Parks protect wildlife, forests, mountains and coasts.
- They are places to visit, learn and enjoy nature.

## Key vocabulary

- National park — protected natural land.
- Conservation — protecting nature.
- Wildlife — wild animals and plants.
- Ecosystem — living things and their environment.

## Why protect them?

Parks keep precious landscapes and wildlife safe for the future, while letting people enjoy and learn from nature.

## From sea to sea

Canada's parks stretch from west-coast rainforests to Rocky Mountain peaks to the Arctic — protecting an amazing variety of nature.
