# Times Tables Progress Grid

Colour in each table as you learn it

## to use this grid

Teacher and pupil instructions

- When you can answer all the facts in a table quickly and accurately, colour in that row.
- The TIMES TABLES CHECK (Year 4 MTC in England) tests all tables up to  $12 \times 12$ .
- Aim: all 12 tables coloured by end of Year 4.
- Test yourself: shuffle and say the answers out loud — not in order.
- Tricky ones:  $\times 6$ ,  $\times 7$ , and  $\times 8$  are statistically the hardest for most pupils.
- MIXED RECALL: the last row is for when you can answer any fact from any table randomly in under 3 seconds.
