

# New Zealand's Natural Resources — Knowledge Organiser

Free from LessonKind · lessonkind.com · Qualified primary teacher

## Key facts

- New Zealand is rich in natural resources.
- Farming, especially sheep and dairy, is very important.
- Forests, fishing and tourism all matter.
- Much of its electricity comes from clean sources like water and geothermal heat.

## Key vocabulary

- Natural resource — something useful from nature.
- Dairy — to do with milk and milk products.
- Renewable — able to be replaced.
- Geothermal — heat energy from inside the Earth.

## A productive land

New Zealand's mild climate and rich land make farming a key part of its economy, alongside forests, fishing and tourism.

## Clean energy

A large share of New Zealand's electricity comes from renewable sources like hydropower and geothermal heat.
