

SCIENCE · GRADE 2

The Human Skeleton

Label the bones

Use the word bank to label the skeleton

Each bone has its everyday name in brackets if helpful — for example, 'femur (thigh bone)'.

[Diagram]

Cut out the labels and stick them in place.

skull	ribs	spine (vertebrae)
pelvis	femur	tibia
fibula	humerus	radius
ulna	scapula	clavicle

Functions of the skeleton

1. Which three jobs does the skeleton do?
2. Which bone protects the brain?
3. Which set of bones protects the heart and lungs?
4. Without a skeleton, what would happen to your body shape?
