# Skip Counting Mazes

Find the right path

## How to play

Each maze has a START and a FINISH. Move only ONE square at a time, up/down/left/right. Each square is a number. You can only step onto squares that are the next in the count. So a 'count by 2s' maze means: 2, 4, 6, 8, 10... don't step on the wrong number!

## Three mazes

1. Maze 1 — Count in 2s, from 2 to 30. Find the path.
2. Maze 2 — Count in 5s, from 5 to 100. Find the path.
3. Maze 3 — Count in 10s, from 10 to 200. Find the path.
4. Bonus: invent your own. Count in 3s. Make a friend solve it.
